SKILLS

Languages:	PHP, SASS, Python, JavaScript, TypeScript, SQL
Frameworks:	OpenRouter, Vue.js, React, Shadcn, Symfony, NextJS, NodeJS, AngularJS
Databases:	MongoDB, Elasticsearch, Redis, MySQL, PostgreSQL, Vector Databases
Technologies / Tools:	AWS, Docker, Jenkins, Jest, Cypress, PHPUnit, OCR, NLP, Computer Vision
Practices:	LLMs (GPT-4, Claude), RAG, Fine-tuning, Prompt Engineering, AI Architecture, Scrum, CI/CD, Agile, Automated testing, Observability, RBAC

EXPERIENCE

Aircury Sep 2025 – Present

Head of Artificial Intelligence · Granada, Andalusia, Spain

- Architected and deployed an AI-driven Reading assessment platform utilizing state-of-the-art LLMs (GPT-5.4, Gemini 3.1), using OpenRouter and Symfony, integrated with Smartgrade to automate complex evaluation workflows.
- Developed consolidated feedback dashboards and standardized grading logic, resulting in a 45% reduction in manual grading time and significantly higher evaluation consistency for educators.
- Directed the AI-native product architecture for EdTech solutions, implementing Fine-tuning strategies and Prompt Engineering that drove a 30% increase in educator productivity and platform scalability.

Aircury May 2022 – Sep 2025

Team Lead · Granada, Andalusia, Spain

- Orchestrated cross-functional delivery teams as a certified Professional Scrum Master (PSM I), translating complex business requirements into prioritized roadmaps and achieving a 20% increase in release frequency.
- Engineered a secure custody platform for law enforcement operations featuring RBAC, multi-signature protocols, and hybrid on-chain/off-chain auditing for 100% data traceability.
- Spearheaded the modernization of legacy infrastructure via CI/CD pipelines, automated testing (PHPUnit, Selenium), and comprehensive observability, reducing deployment failure rates by 35%.

Chess24 Apr 2020 – May 2022

Full Stack Engineer · Granada, Andalusia, Spain

- Contributed to a high-performance multidisciplinary team, managing the maintenance and incremental modernization of critical backend services supporting over 1 million monthly active users.
- Standardized engineering practices and code quality across the stack, leveraging Vue.js, React, and SASS for frontend, and MongoDB, Elasticsearch, and Redis for high-availability data persistence.
- Optimized DevOps workflows using AWS and Docker for containerization, implementing Jenkins-based CI/CD and automated testing (Jest, Cypress, PHPUnit) within an Agile/Scrum framework to reduce time-to-market.

ByBubbly AS Sep 2015 – Apr 2020

Full Stack Engineer · Oslo, Norway

- Owned the full software lifecycle, including iOS mobile development, PHP/MySQL backend architecture, and AngularJS frontend for industrial machine management systems.
- Pioneered the adoption of Scrum methodologies company-wide, establishing agile delivery cadences and improving team velocity by 25% within the first year.

EDUCATION

Scrum.org 2022 – 2022
Professional Scrum Master I (PSM I), Agile Project Management

Universidad de Granada 2012 – 2015
B.E. Computer Engineering, Computer Engineering

LANGUAGES

English: C2
